VOLUME 33: No. 43

Authorized as Second Class Mail. Post Office Department, Ottawa  
ACME, ALBERTA, THURSDAY DECEMBER 2nd, 1954

\$1.50 a Year; 5c a Copy

The Nash's just received word that their Granddaughter, Sandra Sellens, had won the Governor-General's Medal for highest standing in all south (St. Mary's School Division). She is to be presented with the medal on Dec. 10th. We understand it had never been won by a student in Magrath School before.

## SCOUTS and CUBS

The Carbon and District Boy Scout Association was revived on Friday, November 26th at a meeting held at Garrett's Garage. The Scout Committee was formed in preliminary manner pending revival of the Charter. It will meet again after registrations have been approved. Initial formation was agreed as follows:  
Chairman.....Mr. L. Ohlhauser  
Sec.-Treas.....Mr. C. Cave  
Members—Mr. S. Garrett, Mr. R. Pallesen, Mr. F. L. Poxon.

The Committee will have power to enlarge itself or re-form at any time. The groups will be led by:

**Operators**

**HEY KIDS!**

THIS DANDY CAR WASH HAS A  
REAL WATER PUMP AND A MOVING  
BELT FOR YOU TO OPERATE

and you get  
40 toy cars  
with every Car Wash!  
**SEND FOR YOURS NOW!**

Come a' running, Kids! . . . for this is the greatest toy Car Wash you've ever seen. It's just like the garage where grown-ups have their car washed! You operate the handle at the side to move your toy cars along the moving belt inside the Car Wash. At the same time a water pump sprays water from the roof to wash each car as it moves through. When empty, you just refill the water tank at the side.

**Looks like,  
works like a real Car Wash**

You'll have loads of fun lining up the many toy cars you get along with your Car Wash . . . running them up to the ramp, under the water pump and out the other side! Then you give them a wipe with a piece of cloth Mom will give you. You can wash 30 big cars or 60 small ones with every tankful of water! You'll be all ready then to operate this dandy Car Wash . . . and wash your pals' toy cars too when they come over to play with you.

**FREE** With every Car Wash we'll send you a bag containing approximately 40 plastic toy cars (all kinds—cars, trucks, buses) absolutely free . . . They're yours free so you can start right in operating your Car Wash like a real, busy washing station. Hurry, get yours to-day. Mail this coupon Now!

Yours for  
**2.98**  
ONLY

No risk  
because money  
refunded  
by return,  
if not delighted

**HURRY!** You can buy this terrific Car Wash only by mail . . . not on sale at any store. Be sure to get yours now . . . mail the coupon to-day for your Car Wash and Plastic Bag with 40 toy cars.

**MAIL  
COUPON  
TO-DAY!**

## Salmon will get assistance upstream on spawning runs

OTTAWA.—Tank trucks and a watery ski-jump will help the Capilano river's coho and steelhead salmon bypass a new 280-foot high dam north of Vancouver.

The tank trucks will tote the salmon to the river's upper reaches on their annual upstream spawning runs.

The ski jump, built into the face of the dam's concrete spillway, will provide a safe descent for yearling fish on their way to the ocean. About two-thirds of the way down, a projection will send water and salmon shooting outward thus avoiding a crushing impact on water at the foot of the dam.

The twin meanders for conserving the Capilano's salmon runs were described in the federal fisheries department's magazine, Trade News.

Conservation steps became necessary with the building of the giant dam near the Capilano's mouth to provide a reservoir of water for the Vancouver area. The river runs down from

the mountains lining the north shores of Burrard Inlet, north of Vancouver.

### Flow diverted

During construction of the dam, the river's flow was diverted through a tunnel in the canyon wall. This fall the tunnel will be closed.

Coho and steelhead bound upstream to spawn will be diverted by a steel fence stretching across the river into a 300-foot-long concrete fishway which leads to a series of three concrete pools.

Using the principle that spawning salmon always swim against the current, fisheries engineers have planned water flows through the pools to lead the fish into the third, or loading pool. A giant steel hopper then lifts the fish and empties them into a tank truck. The salmon will be returned to the Capilano several miles above the dam. Pumps will keep oxygen circulating in the closed tanks during the trip.

## Canada's northland has great riches

The riches of Canada's northland, the great areas of the Northwest Territories and the Yukon, may surpass those of any other country in the free world.

There is gold in the North, being produced in mines where perhaps only 20 years ago there was wilderness. Men first extracted oil from the banks of the Lower MacKenzie River 30 years ago. In the farthest islands, lying within the shadow of the North Pole, there may be more oil in a place called Elef Rignes than in all of Oklahoma or Alberta.

Canada's North has radium, uranium, lead, zinc, nickel, asbestos, silver and iron. And there are fisheries on Great Slave Lake, and unbounded sources of power.

## Itch..Itch...I Was Nearly Crazy

Very first use of soothing, cooling liquid D. D. D. Prescription positively relieves raw red itch—caused by eczema, rashes, scalp irritation, chafing—other itchy troubles. Greaseless, stainless. 30c trial bottle must satisfy or money back. Don't suffer. Ask your druggist for D. D. D. PRESCRIPTION

MAKE CHRISTMAS ANGELS WITH PATTERN 320

These angelic figures made of stiff paper and painted in bright colors will be found most useful at Christmas time. The pattern gives tracing diagrams for a variety of sizes and styles. Some stand six inches high holding a song book. Use these for table decorations. There are several sizes for tree decorations. And for hand-painted greeting cards that just fit an ordinary envelope. Each step is illustrated on the pattern from tracing the outline of the figures to the fascinating part of using ordinary water colors to bring out the unusual realism of these figures. This pattern is 320 and may be ordered separately at 35c or it will be included in the Christmas Decorations Packet of five standard size patterns for \$1.50 postpaid.

Address order to—  
Department P.P.L.,  
Home Workshop Pattern Service,  
4433 West Fifth Avenue,  
Vancouver, B.C.

### FAMOUS FOR FLOWERS

The name of Addis Ababa, capital of Ethiopia, means "new flower" and the city is famous for its many varieties of flowers.

## Man., Sask. get \$76,000 hospital aid

OTTAWA.—Hon. Paul Martin announced that Manitoba and Saskatchewan will receive more than \$75,600 in federal grants under the terms of the National Health Program.

The Birtle District Hospital at Birtle, Manitoba, will receive a \$26,313 grant. The funds will help meet the cost of replacing the present hospital building which is now considered obsolete. The new building will house 16 active treatment beds, a six-basinet

nursery, operating and delivery rooms, x-ray and laboratory facilities, a community health centre, and an eight-bed nurses' residence.

A grant of \$24,227 will also go to Manitoba. It will be used to assist in the purchase of x-ray equipment for the St. Boniface General Hospital. It is expected that the new equipment will enable the hospital to improve its diagnostic facilities and to provide more extensive training in the use of x-ray facilities.

Saskatchewan is to receive a \$25,150 grant which will be used to strengthen the rehabilitation programs at the Regina and Saskatoon Physical Restoration Centres. These centres provide rehabilitation facilities for disabled persons for whom the provincial health authorities are responsible.

Eat Right - Live Right - Feel Right

## Golden Fish 'n' Batter

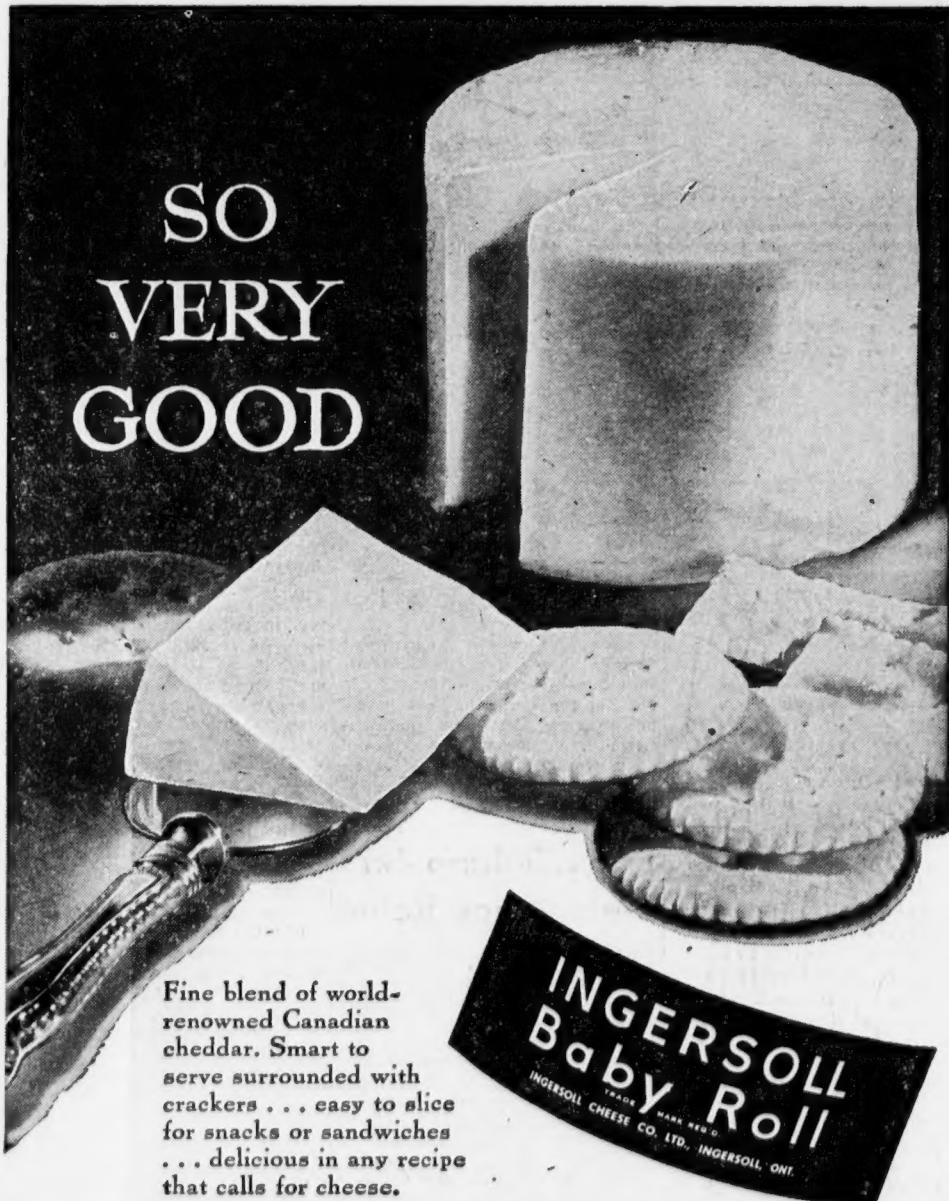

Heat shortening (it should be at least two inches deep) to 370° in a deep-frying pan. (If a fat thermometer is not available, test fat temperature with a cube of bread—the bread should brown in 60 seconds). Cut 1 pound filets of any suitable fish into serving sized pieces and sprinkle lightly with salt. Mix and sift into a bowl 1 c. once-sifted pastry flour (or ¾ cup once-sifted all-purpose flour), 1½ tps.

Magic Baking Powder and ½ tsp. salt; stir in ¾ c. very cold water and beat until batter is very smooth. Dip fish pieces in batter and then fry in heated shortening, turning once, until golden. Drain thoroughly on absorbent paper, sprinkle lightly with salt and keep hot until all fish has been cooked. Yield—4 servings.

Always Dependable

SO  
VERY  
GOOD

Fine blend of world-renowned Canadian cheddar. Smart to serve surrounded with crackers... easy to slice for snacks or sandwiches... delicious in any recipe that calls for cheese.

**INGERSOLL**  
Baby Roll  
INGERSOLL CHEESE CO. LTD., INGERSOLL, ONT.

## Funny and Otherwise

"Have you told Mr. Smith he's just become the father of triplets?"

"Not yet—he's shaving!"

Patient: "How can I ever pay you for your kindness to me?"

Doctor: "By cheque, money order, or cash."

"Was my husband intoxicated when he came home last night, Mary?"

"I didn't notice anything, ma'am. He only asked for a mirror to see who he was."

One of Levinsky's customers was notorious for his slowness in meeting liabilities. In desperation Levinsky sent the following letter:

"Sir—Who bought a lot of goods from me and did not pay?—You. But who promised to pay in sixty days?—You. Who didn't in six months?—You. Who is a scoundrel, a thief and a liar?—Yours truly, Al Levinsky."

A customer was sitting in a barber's chair when a man burst into the shop shouting: "Hi! Mr. Smith's house is on fire!"

The customer shot out of the chair, dashed for the door, and ran like a hare up the street. After a time he stopped suddenly. "Gosh!" he gasped, "my name isn't Smith!"

# Scientists not only talk weather they're doing something about it

An up-to-date weather station collects weather conditions for relaying to a central computer

By Richard S. Bloch  
(CPC Correspondent)

WASHINGTON. — In 1922 an English mathematician named Lewis F. Richardson had a fantastic vision for making the prediction of weather more accurate, a vision which is about to come true. He compared his dream method with the intricately co-ordinated performance of a vast symphony orchestra.

If thousands of persons, Richardson thought, each with a desk computer, would work together and augment each other's efforts, the equations to predict the state of the atmosphere for any given time would be solved.

Richardson, the founder of numerical weather prediction, was the first person to set down a list of all the equations and interactions of equations needed for the precise forecast of atmospheric conditions.

Then, as now, forecasters work with approximate rules based on physics, a few calculations, plus their years of experience, a method which is wide open to human error. Two forecasters might give two different answers from the same information.

## Strictly fresh :-

A poor fish was almost served up, nicely browned, in Winton, N.C., recently. Man name of Bass was rescued by firemen from his flaming mattress.

High school students in Westfield, Mass., have been fired from posts as aircraft spotters for the Ground Observation Corps because they were using their binoculars to watch football games, among other things. Maybe they were looking for flying tackles.

Prisoners at Angola, La., state penitentiary have been deprived of 10 dice tables confiscated with-

in the prison walls, according to authorities. Warden must have been afraid of an escape by "box-cars".

Schools in peach-growing area of Palisade, Colo., recently received some 700 cases of canned California peaches from the federal school lunch program. Just wait until John L. Lewis receives a shipload of coals from Newcastle!

Man in Mexico City, Mexico, has been sentenced to prison for counterfeiting lottery tickets, and is making more money as a prison baker than he ever made before. Just goes to show you, honest dough is the best kind.

Drive With Care!

was the computer which, in a test at a later date, correctly calculated the disturbance.

It achieved similar success when it calculated conditions indicating the storms of Nov. 12, 1952 and Nov. 9, 1953, both in the eastern United States. This was enough to convince scientists and the U.S. government that the numerical methods worked out for the machine were more accurate than any existing methods known.

The project at the Institute for Advanced Study which led to this development was established in 1946. The scientists at Princeton studied in turn, "each of a sequence of successively improving idealized mathematic models of the atmosphere."

The first models were very simplified but some results were felt as early as 1949. In 1950 the Princeton scientists attempted for the first time to use an electronic computer for numerical prediction.

In 1952 they completed the institute computer and in early 1953 they solved the problem of the prediction of storm generation, or cyclogenesis, as it is known in the weatherman's terminology. Cyclogenesis is the chief obstacle to accurate weather prediction.

According to Dr. George P. Cresman, director of the joint numerical weather prediction unit, we can look forward with confidence to a steady improvement in the results of numerical prediction and a corresponding improvement in the forecasts.

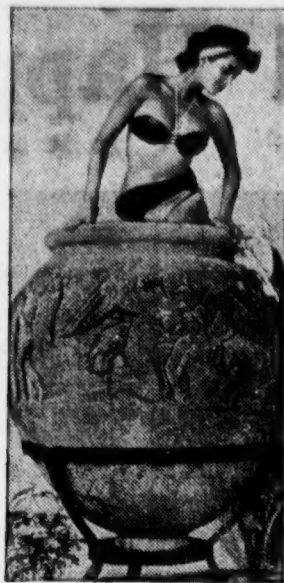

The effects of more accurate weather prediction will be felt by all of us in our daily living. It will mean a better warning system for hurricanes, tornadoes, snow flurries and violent thunderstorms.

Because a thousand and one different types of enterprises depend upon the vagaries of the elements, it will mean more efficient business and farming practices.

When the evening forecast says fair and warmer tomorrow we can go to sleep knowing that this will be so, for the giant machine is a product of man's highest ingenuity.

## Baking soda paste relieves burn pain

Ouch! A nasty burn and it hurts! Don't wait, apply soothing baking soda in a thin paste to relieve the pain. Best of all, soda helps heal a burn by promoting natural tissue repair. And if that burn pops up into a blister, just mix as much baking soda as possible for a saturated solution. Keep the blister well moistened with gauze dipped in the solution and soon all the fluid will drain out without puncturing. Blisters should never be opened except by a doctor so that infection has no chance to set in.

THIS'LL "JAR" YOU — Prettiest flower ever to blossom from this ancient Sicilian urn is Aurora de Alba, Spanish-born actress who lives in Taormina, Sicily. Not quite fitting the urn, the "flower" had to remove some of her "petals" to pose for this picture.

## Thin ice poses constant danger

In all parts of the province, thin ice has formed on ponds and lakes. In most places it is not yet more than 1 1/2 inches thick. The minimum of safety for one person to walk on new ice is two inches. Small groups should wait until three inches of ice has formed.

However, four inches can be considered quite safe for normal activities. It is wise for groups of people not to gather in one place or cars and trucks not to venture onto the ice until after a continuous freezing spell.

Warm days can change the texture of ice and what was safe in the early morning, can be dangerous by mid-day.

Parents are urged to warn their children of the thin ice danger and they would be wise to keep small children under closer scrutinizing during the ice-forming period.

When outdoor skating and other activities are going on, the participants are advised to have a long pole, plank, ladder, or rope handy in case a break-through occurs. If no such equipment is available, rescuers might form a human chain by lying down on the ice with the lightest person squirming out to the victim with the others following. Each "link" of the chain grasps an ankle of the person ahead when the victim is to be pulled out of the hole.

Since the end of the war British Columbia's factory output has increased in value by more than 100 percent.

# Canadian statistics report

(A Weekly Review)

**Agriculture** — Despite adverse weather conditions which seriously delayed harvesting in the Prairie Provinces this fall, an estimated 86% of the acreage of the five principal grains had been cut and an estimated 63% had been threshed by October 15. Since then, generally good weather conditions have prevailed throughout the Prairies and further progress has been made towards the completion of the harvest in most districts.

**Production** — The level of Canada's industrial production was nearly 2% below last year in August, averaged almost 3% lower in the first eight months. August mineral production was up nearly 13% this year, and output of electricity and gas was 7% higher than in 1953. Manufacturing production, however, continued to decline, the August output averaging 5% below last year. Durable goods continued to account for most of the drop with a decrease of 9% as compared with a decline of less than 2% in non-durable goods.

**Foreign Trade** — A 2% decline in the value of Canada's commodity exports this September was more than matched by a 9% decrease in the value of commodity imports and the result was a small overall export surplus, the second this year. In the first 3 quarters of 1954 exports were down 7.8%, imports 8.2%, resulting in a drop of nearly 14% in the cumulative import surplus as compared with last year.

**Merchandising** — For the first time since 1949 Canada's retail merchants sold less in August than in July. August sales were down 6.4% from the preceding month and were 3.6% under last year's August dollar volume. The 8-month tally shows a decrease of 1.6%.

**The People** — The upward trend in births and the downward trend in deaths continued in September, and totals for the first 3 quarters of 1954 showed an increase of nearly 7% in births and a decrease of 4.5% in deaths as compared with last year. Marriage registrations in September were slightly under September, 1953, and the 9-month total was down about 3% from last year.

The water flowing over Niagara Falls never has been halted by ice. The Irish were the first Europeans to recognize the potato as a staple food.

# Try New Way to Prepare Eggs

BY DOROTHY MADDOX

NOW is bargain time for eggs — one of our most important sources of top-quality protein. Hens are laying in record volume, and producers' prices are at rock bottom.

Here are some excellent directions for cooking eggs, prepared for us by Kathryn B. Niles, distinguished home economist of the Poultry and Egg National Board in Chicago. Nothing elaborate about them, but awfully good for family menus.

## Baked (Shirred) Eggs

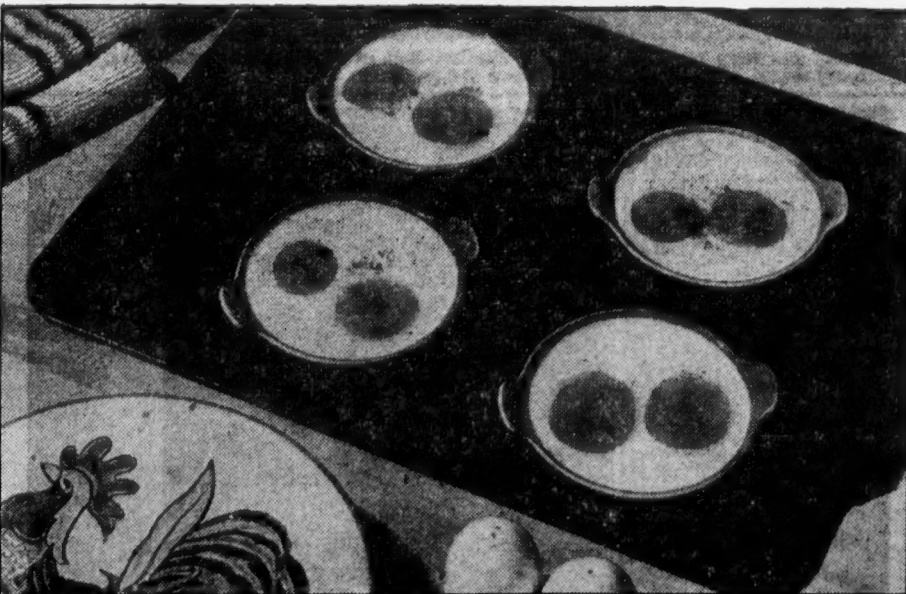

Break and slip 1 or 2 eggs into greased individual shallow baking dishes. Bake in slow oven (325 degrees F.) 12 to 18 minutes, depending upon firmness desired. Serve from baking dishes.

## Variations:

1. Circle a strip of partially cooked bacon around edge of dish. Line bottom of dishes with buttered crumbs.
2. Line bottom of dishes with buttered crumbs. Place a slice of cheese atop crumbs, then break eggs into dish. Top with grated cheese or crumbs. Proceed as above.
3. Pour 1 to 2 tablespoons cream into each dish. Break eggs into dish and proceed as above.

## Puffy Omelet (2 to 3 servings)

Four eggs, separated; 1/2 teaspoon salt, 1/4 cup water, 1/4 teaspoon pepper, 1 tablespoon fat. Add salt and water to egg

Baked eggs for breakfast or lunch are an economy treat, and there's nothing elaborate about them.

whites. Beat until stiff and shiny and until whites leave peaks when beater is withdrawn. Add pepper to yolks and beat until thick and lemon-colored. Fold yolks into egg whites.

Meanwhile, heat fat in large skillet (10-inch diameter) until just hot enough to sizzle a drop of water. Pour in omelet mixture. Reduce heat. Level surface gently. Cook slowly until puffy and

lightly browned on bottom, about 5 minutes. Lift omelet at edge to judge color. Place in a slow oven (325 degrees F.). Bake until knife inserted into center comes out clean, 12 to 15 minutes.

To serve: Tear gently, using 2 forks, into pie-shaped pieces. Invert "wedges" on serving plate so that browned bottom becomes the top, or omelet may be folded in half.

Proper refrigeration helps to maintain the original quality of eggs. Eggs may be stored commercially for several months at temperatures as low as 32 degrees F.

In the home, egg quality is maintained by storage in the refrigerator or at cool temperatures. Whenever possible buy eggs that have been kept under refrigeration.

# World Happenings In Pictures

\*\*\*\*\*

\*\*\*\*\*

\*\*\*\*\*

\*\*\*\*\*

**QUEEN MOTHER ELIZABETH**, who was recently in the U.S. on an informal visit and West German Chancellor Konrad Adenauer, who met high U.S. officials in a series of conferences, chat in the Cathedral prior to the convocation ceremonies at Coumbus University where they both received honorary degrees.

**NOTHING TO BLUBBER ABOUT**—Greenland orphans in a Copenhagen, Denmark, orphanage enjoy a rare treat, raw whale blubber, taken from stranded whales. It's better than candy, to judge by the expression on their faces.

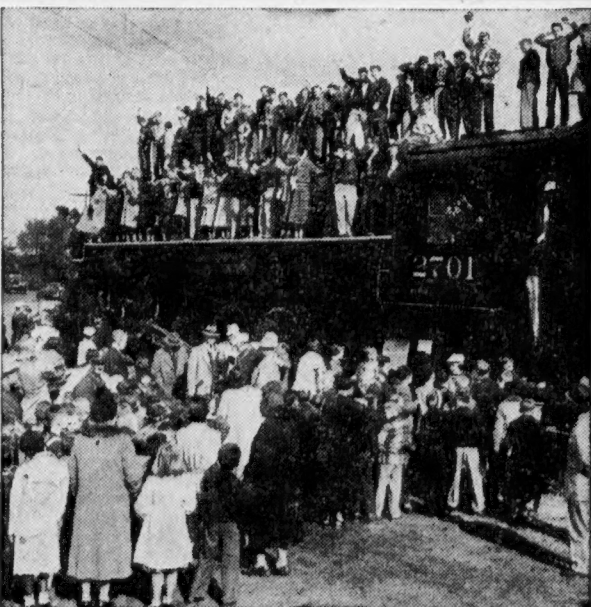

**GIDUP!** Toronto's marathon swimmer Marilyn Bell, right, and Shirley Thomas, the Capitol's horse-jumping champ, try a sloop at the Ottawa Winter Fair.

**RUB-A-DUB-DUB A MAN IN A TUB**—Roy Berge of Edmonds, Wash., puts along slowly after launching a baby bathtub, with pon-toon, in which he plans to sail to Alaska.

**GEORGE MIHAILA**, 26-year-old Romanian farmer, smilingly displays his worn-out shoes on his safe arrival in Munich, Germany, after a 24-day running contest with Russian, Czechoslovakian and East German soldiers and police. During his flight, Mihaila was under Communist gunfire three times.

**LOCOMOTIVE VALHALLA**—Most steam locomotives considered obsolete go to the scrap foundry, but this Class 4K Kanawha high-speed freight hog has found a final resting place in La Salle Park, Buffalo, N.Y. Donated by the Chesapeake and Ohio as a monument to the age of steam which helped make Buffalo the nation's second largest rail centre, it will be on permanent display for the enjoyment of oldsters and the amazement of a generation which is more familiar with the diesel locomotive. Built in 1943, the quarter-million-dollar locomotive is 105 feet long, weighs 425 tons with loaded tender and has pulled as many as 160 loaded coal gondolas at one time during its years of service.

## CARBON

Lloyd and Keith Halstead have returned from the Toronto Winter Fair.

**BORN**—To Mr. and Mrs. Jack Adams Nov. 27th, a daughter, in the Thorsby hospital.

Mr. and Mrs. Eddie Sellens (nee Irene Nash) of Magrath have been transferred to a Calgary Branch of the Bank of Montreal.

Mr. George Appleyard Sr. is visiting at the homes of his sons, Joe, George and Jack. George said it was too wet, and he got drowned out so thought he would come home to Sunny Albera.

Mrs. C. Smith is spending a few days at the home of her grandchildren Mr. and Mrs. Doug Prowse and visiting old friends. Nice to see you, Mrs. Smith.

Dr. McFarlane informs us his office will be closed for a period of time. Announcement later.

Mr. Jake Ziegler is a patient in the Drumheller hospital where he recently underwent an operation.

### YOU CAN FEED DAMAGED GRAIN

In an article in the November issue of Canadian Cattleman, Dr. Frank Whiting, Nutritionist at the Lethbridge Experimental Station, outlines the value and use of damaged grains as livestock feed.

Grain damaged by frost (with the exception of flax), sprouting, and rust, is not harmful to livestock. Heated grain usually is not harmful but may in some cases, cause digestive and other disturbances. Badly frozen and rust-damaged grain usually contains a high percentage of chaff and weed seeds. Chaff has no value. Weed seeds do have some value for cattle and sheep but only limited value for swine and poultry.

Damaged wheat, like ordinary wheat, is a heavy feed. Dr. Whiting warns, and should be introduced into the ration gradually. This is especially true for cattle and sheep. Most of the dissatis-

faction and death losses resulting from feeding damaged wheat is a result of introducing it into the ration too quickly.

Experiments and experience, Dr. Whiting says, have shown that frost-damaged wheat which does not weigh less than 45 lbs. per bushel is a satisfactory feed for all classes of livestock. Wheat weighing less than 45 pounds per bushel has not proven to be a good feed for fattening livestock as stock do not eat sufficient quantity of it to make rapid gains. It is satisfactory as a feed for wintering dry stock.

Frozen barley and oats contain a much higher percentage of hull than non-frozen grains, and cannot be classed as fattening feeds. Swine and poultry are unable to digest hulls efficiently and therefore badly frozen oats and barley should not constitute a large proportion of their feed.

Flax, if frozen before it is mature, is poisonous and should not be fed to livestock. Cooking, however, makes it safe to feed.

Dr. Whiting concludes that not only are the damaged grains safe when fed with care, but their value as a feed compared to non-damaged grain is often greater than the current market prices which are usually based on the value of the grains for milling and processing purposes.

**CONTRIBUTIONS TO A COLD**  
Coughs and colds are usually most plentiful in winter and in spring. Damp cold feet are an encouragement to a cold, so wearing rubbers will help to ward off the ailment. People who cough and sneeze without covering nose and mouth with a disposable tissue can spread cold germs.

### ARE YOU THINKING OF HAVING A SALE?

Here is why I believe it would be to your advantage to have me sell for you.

- (1) A graduate from the largest School of Auctioneers in the World, having taken a course of study in General Sales, Live Stock Judging and Pedigree Reading and advertising.
- (2) Have sold an average of 2 sales per week since Feb., '54.
- (3) No Sale too big or too small. All receive the same courteous attention.

Free Sales Service to any Church or charitable organization.

## I'M TALKING TRUDY THE DOLL THAT TALKS ... in RHYME!

Yes, Talking Trudy is always ready to say her piece! "Mary had a Little Lamb," "Rock-a-Bye Baby," "Pussy Cat, Pussy Cat" or "Oh, where has My Little Dog Gone" . . . ask your little girl which of these four famous nursery rhymes she likes best. Trudy will recite that rhyme as often as you want. Trudy is a big, beautiful cuddly doll, all decked out in a sweet plaid pinafore and cute hooded bonnet to match. She's 24 inches tall and sturdily built to take all sorts of punishment and still talk in rhyme. There's no complicated machinery, no delicate settings to go wrong. Just turn the sturdy handle at Trudy's back and she talks in rhyme . . . every time!

### HURRY! HURRY!

Don't disappoint your little girl. Make sure that she gets her "Talking Trudy" doll. ORDER NOW. Supplies are limited so don't delay and be sure to state your first, second, third and fourth choice of nursery rhymes by numbering the squares in the attached coupon.

# The Sports Clinic

(An official department of Sports College)  
Conducted by Lloyd "Ace" Percival

## Short strides for more yards

After studying movies taken this fall of teen-age football teams at practice and in games, we see that the average ball carrier runs with too long a stride. This is bad because (a) it slows down his starting time and (b) has a detrimental effect on his ability to change direction quickly and generally perform the manoeuvres required of a good ball carrier. When the ball carrier starts with long strides he takes considerably more time to get under way than he would if he took a series of short strides. The same principle as used by sprinters on the track should be used by the ball carrier when he is getting started. He should concentrate on taking a series of from 4 to 6 short steps, getting his feet on the ground as often as he can as he is getting under way. This enables him to get away faster and develops more momentum which, of course, is very important especially if he is going into the line. The coach who teaches his whole back-field to use short strides at the start of the play will find his plays getting away much faster. Such speed is especially important in the "T" formation. After the ball carrier gets started he should continue to use fairly short strides until he sees the opening he is looking for. Then, once he is in the clear, he can lengthen out. The reason it is much better to use fairly short strides until the open spaces are reached is because the use of short strides makes it possible for the ball carrier to change direction much faster, to pivot tighter and in better balance and to generally make the different moves he must make to avoid the defensive players and break through any opening.

### How to care for a nose bleed

Even though a nose bleed is a very common injury in sport very few people actually know how to

care for such an injury properly.

The first thing to do is to get the injured athlete in a comfortable, sitting position. Don't let him lie on his back. Next, make sure he does not blow his nose or do any hard sniffing. Tell him to relax and breathe through his mouth. When the athlete is comfortable apply ice or cold water to the back of the neck and to the bridge of the nose itself. This will shrink the blood vessels leading to the nose and slow down the bleeding. As the ice or cold water is being applied the nose should be compressed by holding it fairly tightly with the fingers. It should be held the same as you hold it when trying to keep out a bad smell. The nose should be gently squeezed in this way for several minutes.

If he feels O.K. the injured athlete can do the holding himself. If this bleeding does not stop after a few minutes, make two plugs of gauze bandaging and soak them in either Peroxide or a mild solution of Codine and water. Then plug the nostrils of the athlete with these. Make sure the end of each plug sticks well out of the nostril. If this doesn't do the trick the best plan is to get the athlete to a doctor who will be able to stop the bleeding by using surgical methods.

If, by chance, the nose bleed follows a hard blow on the head, it is best to check with the doctor right away as a nose bleed caused in such a way may mean more serious trouble. However, most nose bleeds are caused by the breaking of several small blood vessels inside the nose following a blow on the nose or picking with a sharp finger nail. The average nose bleed is nothing to worry about if treated with proper care.

## WEEKLY BIBLE COMMENT

### LORD'S PRAYER OUTLINES IDEAL WORLD FOR US

When we make that petition which is the Lord's Prayer, what do we mean by it, and what should it mean to us?

One thing is certain. When we make that prayer in sincerity and truth the Kingdom has already arrived in our hearts and lives. The Rule of Christ, His law of love, and the following of His example, give evidence of our place in the Kingdom which is above all kingdoms, and whose King is supreme.

If that rule is firmly established in ourselves it becomes a yearning, a passion, and a prayer that it might be established in all hearts, and in all the affairs of men.

It is this yearning and prayer that is so well expressed in the interpreting petition, "Thy will be done in earth, as it is in heaven." There was a time not long ago when allegiance to the Kingdom of God conflicted with the allegiance to most of the kingdoms of earth. In too many countries that conflict still continues, or has been reasserted, under cruel dictatorships in which godless philosophies and attitudes are manifest in suppression and persecution.

But today, in such democracies as Canada, the United States and Great Britain the evidence of almost revolutionary progress is seen in the fact that such conflicts of allegiance have almost completely disappeared.

If it were not for all the evil that democracy has not yet conquered, we might well say: "Would that all nations and peoples were as we are." However, evil carries within itself the seeds of destruction, and so in faith and hope we must pray that some day we may realize the Kingdom of God in full, in our every act and deed.

Drive With Care!

### Canada's food guardians

Canada is largely free from trouble with food or drugs which are below standard quality or otherwise harmful to health, a state of affairs which can be credited to her food and drug inspectors who not only keep an eye on domestic food and drug products but also on all such articles imported into this country. Every citizen can co-operate with this service by reporting filthy, decomposed or adulterated foods to the local food and drug inspector.

## Ten Word INTELLIGRAM

Check the correct word:

- Experts maintain men (do) (do not) reach their peak in many executive capacities until 55-65 years of age.
- The tobacco industry (has) (has not) set up a research organization to study tobacco in relation to disease.
- (Los Angeles) (San Francisco) is plagued with a worsening "smog" problem.
- A Tibetan armed uprising against occupying Chinese Reds (has) (has not) been partially successful.
- A dispute over currency exchange is causing friction between the U. S. and (Japan) (Korea).
- British Foreign Secretary Anthony Eden is now a Knight of the (Garter) (Bath).
- Vermicelli is a type of (cheese) (spaghetti).
- New Mexico is the (Pueblo) (Land of Enchantment) state.
- A hexagon has (six) (seven) sides and angles.
- November's flower is the (narcissus) (chrysanthemum).

Check your answers, scoring yourself 10 points for each correct choice. A score of 0-20 is poor; 30-60, average; 70-80, superior, and 90-100, very superior.

## Joint exercise 'Bulldog Two' against sub-Arctic invasion planned for early December

OTTAWA.—A joint training exercise for soldiers of Canada's Mobile Striking Force, and airmen from many parts of Canada, will take place near Fort Churchill, Man., early in December, it is announced by Defence minister Ralph Campney.

Exercise "Bulldog Two" has been planned on the theory that an enemy force has landed in the central sub-Arctic area of Canada's northland. The Canadian Army and the Royal Canadian Air Force will be required to launch an airborne assault to reduce the "enemy" lodgement using Edmonton as the main base for operations and Fort Churchill as an advanced base.

Before the start of the exercise a company of 1st Battalion Le Royal 22nd Regiment will move to the exercise area from Churchill to play the role of the "enemy" force.

The 1st battalion, The Royal Canadian Regiment, of London, Ont., commanded by Lt.-Col. T. R. McCoy of Hamilton, Ont., with airborne support elements such as artillery, signals, medical and army service corps, will form the assault force. Canadian Rangers in the Churchill area will be organized to participate in the exercise.

Transport, reconnaissance, administrative and medical evacuation aircraft under the operational control of 1 Tactical Air Command, Royal Canadian Air Force, will be based at Churchill in support of the winter battle. Two RCAF transport squadrons flying C-119 Packets will take part.

### Parachute training

In addition to realistic Arctic training for men charged with the defence of Canada, "Bulldog Two" is to be a test for certain types

of equipment and supplies. Scientists of Defence Research Board and Joint services operational research teams will carry out studies in conjunction with the manoeuvres.

Over-all control of the exercise will be in the hands of Maj.-Gen. Chris Vokes, general officer commanding, Western Command, and Air Commodore Sheldon W. Coleman, Air officer commanding, 1 Tactical Air Command, RCAF. Brigadier George Kitching, chief of staff at Western Command, has been named exercise director and Group Captain Harold E. Walker, commanding officer, RCAF station, Edmonton, deputy director.

In preparation for severe tests to be encountered during Exercise Bulldog, the bulk of participating troops will take northern unit training during the last two weeks of November. During this same period, buildings are to be erected at the exercise site to simulate a northern weather station. This weather station will be put off the air to indicate the "enemy" landing and start of the exercises.

To create the realism and difficulties of northern operations all personnel, weapons, equipment and supplies of the attacking force will be parachuted into battle.

Army and RCAF umpires will work with attackers and defenders to add realistic control to the exercise by creation of "casualties," evaluation of defence obstacles, and assessment of tactical operations. Lt.-Col. J. R. Cameron, commanding officer of 1st battalion, Princess Patricia's Canadian Light Infantry, of Calgary, has been appointed chief umpire.

Upon completion of the training exercise, troops will trek back to Churchill and return to home stations by rail.

## Quick Canadian Quiz

1. Density of population in the United States is about 51 persons per square mile. What is the figure for Canada?
2. In net value of production manufacturing is now the leading wealth producing industry in what provinces?
3. In what year was the name of the Royal North West Mounted Police changed to the Royal Canadian Mounted Police?
4. Through the indirect sales tax on manufactured goods Ottawa collects how much each week?
5. In what year were tariffs first used in Canada to build domestic industry rather than merely as a means of providing government revenue?

## ::: APPETIZING RECIPES :::

Try Ginger Ale Salad for a company luncheon. Canned peaches, nuts and celery are moulded in lemon jelly. Serve with a plate of sandwiches and pots of hot tea.

**GINGER ALE SALAD**  
One package lemon or lime flavored jelly powder, 1 cup hot water, 1 cup ginger ale, 1/4 cup chopped nuts, 1/4 cup chopped celery, 1 cup drained sliced sweetened peaches.  
Dissolve jelly powder in hot water. Add ginger ale. Chill until

slightly thickened. Arrange a few peach slices in individual molds. Cover with part of the gelatin. Dice remaining peaches and fold with nuts and celery into remaining gelatin. Pour into molds. Chill until firm. Unmold on crisp lettuce. Serve with mayonnaise. Makes 6 servings.

## Development of White Horse as Yukon capital planned

OTTAWA.—The government has announced plans for development of White Horse as capital of the Yukon Territory and hub of the Northwest, including bridging of the Yukon River and establishment of a \$3,000,000 hospital on a new development site.

Hon. Jean Lesage, Northern Affairs Minister, said cost of construction projects would be shared between the Federal Government and the Territorial Government of the Yukon. The Territorial Government will consider final details shortly. If plans are approved, work will begin next year.

A 300-foot bridge costing \$750,000 would be thrown across the Yukon River to open a new area east of White Horse, whose expansion now is hampered by low-

lying industrial land of the north, rough, steep terrain to the south, and a military airport reserve to the west.

### Modern hospital

The new site would be opened for home-building, but the biggest single project would be a modern, 120-bed hospital costing an estimated \$3,000,000 to serve as focal point of northern health service in the Yukon.

Announcement said the hospital would provide treatment for Indians under Federal care, take care of armed forces in the Yukon, and serve the needs of White Horse's 3,500 residents.

Two hundred serviced building lots for homes will be sold on the new subdivision, occupying a rise 30 feet high on the east side of the river across from the city proper. Ultimately, as many as 3,000 lots may be available.

Mr. Lesage said the Federal and Territorial Governments have already agreed on division of cost for the hospital. Funds to meet the estimated \$780,000 cost of servicing the new area will be loaned by the Federal Treasury and are expected to be recovered by proceeds from sale of the initial group of lots.

Geography and the pace of development have produced high land values in White Horse. While relatively cheap five miles from the city, a serviced lot in downtown White Horse may cost as much as \$10,000.

## Queen Mother personification of graciousness

BALTIMORE.—The Baltimore Sun described Queen Mother Elizabeth as "a royal visitor who personifies the word gracious."

"For more than six centuries the British people have used the word 'gracious' as a courteous epithet in referring to their kings and queens," the newspaper says in an editorial.

"It is a word which admirably fits our present royal visitor, Her Majesty, Queen Mother Elizabeth of England."

"Through all the variety of public appearances she has gratified her hosts by showing evident appreciation for her cordial reception and for the many attractions New York City has to offer visitors. It is an attitude one likes to see in any guest. It is particularly flattering when the guest is a queen."

### Veteran of N.H.L.

Milt Schmidt is the National Hockey League veteran in every sense of the word. Milt is the oldest player in the circuit at 36 and is also the oldest in point of service. He is starting his 16th season with the Boston Bruins. The captain and assistant coach of the Bruins, Schmidt is only three goals short of Dit Clapper's all-time record of most goals scored by a member of the Bruins. Clapper's record is 228 goals.

### "LUCKY BLUEBIRD"

When a girl here gets married in Carlyle, Sask., there's a good chance the traditional "something borrowed" will be a brooch belonging to Mrs. Bruce Forsyth. Known as a "Lucky Bluebird", it was first loaned years ago and Mrs. Forsyth says she recently handed it out for the 100th time.

## ::: GEMS OF THOUGHT :::

### DOMINION OVER FEAR

A man's fear, unconquered, conquers him, in whatever direction.—Mary Baker Eddy.

It is only the fear of God that can deliver us from the fear of men.—Witherspoon

There is great beauty in going through life without anxiety or fear. Half our fears are baseless, and the other half discreditable.—Bovee

He who fears being conquered is sure of defeat.—Napoleon

No one loves the man whom he fears.—Aristotle

Fear is more painful to cowardice than death to true courage.—Sir Philip Sydney

## On The Side • By • E. V. Durling

Say young fellow, how about that girl you think might answer in the affirmative if you popped the important question? What is the color of her eyes? It is amazing the number of fellows who can't answer that question regarding the girls of their dreams. Is also a fact that many men don't even know the color of their wives eyes. This angle plays quite an important part in that highly entertaining stage comedy titled "King of Hearts." The heroine, having to make a quick decision as to which of two men to marry, chooses the one who knows the color of her eyes. The fellow who lost out was especially unobservant because the girl had one blue eye and one brown eye. In conclusion, let me offer a word of warning to husbands. If your wife asks you the color of your secretary's eyes, claim ignorance of it, say you never have noticed. The feminine view is that when a man knows the color of a girl's eyes he is interested in her in a really romantic way.

### Saving razor blades

The longevity of safety razor blades can be increased by stropping them inside a drinking glass. There is no doubt about that. It is interesting to note that this excellent advice as to making blades last longer was first offered by the safety blade manufacturers. That was during the war when there was a blade shortage due to the fact that the manufacturers were devoting most of their efforts to producing war materials. Now the aforementioned advice has acted as a boomerang. Any effective method of blade sharpening is, of course, a serious threat to the safety razor blade business.

### A penny in your shoe

Did your bride have a penny in her shoe on her wedding day? If not, she should have. Or, at least that's what a recent Brooklyn bride claims. She says I did not quote the complete version of the "something old" poem of advice to brides. Says complete version is: "Something old, something new, Something borrowed, something blue And a penny in your shoe."

### He beat Marciano

The only boxer ever to defeat Rocky Marciano was Joe De Angelis. Joe defeated Rocky in a U.S. army championship bout. Joe is now driving a bus in Charlestown, Mass.

### Cured his baldness

Is there a cure for baldness? Many experts on the subject say there is not. That the condition is hereditary and cannot be rectified. Nevertheless, it could be a cure for some cases of baldness may have been discovered by accident. Dr. John Kelvin, a Scottish physician of Glasgow, gave a 63-year-old patient named Ted O'Neill some tablets for relief of artery trouble. That trouble was relieved and shortly after hair began to grow on Mr. O'Neill's erstwhile bald head. Another bald-headed male patient of Dr. Kelvin's had the same experience after taking some of the tablets. The tablets are supposed to stimulate circulation. The incident has been the subject of an article in the British Medical Journal. A few days after it was made public, the aforementioned tablets for which no prescription is necessary were sold out in all drug stores in Glasgow and in many in London.

## Kitchen Meditations

By JANE DALE

### LESSONS FOR A YOUNG GIRL

She can be taught to write and read;  
To knit and sew, and attend each to knit and sew, and attend each need;  
She can be taught all cookery lore;  
Good simple arts and many more.  
If someone only takes the trouble  
Her knowledge soon would nearly double.

But who can teach her grace and charm  
The art of keeping clear of harm?  
Teach her to know when friends are true;  
The time to play and the time to do;  
Teach her beware of rash love's spell;  
The pain and joy no heart will tell?  
How to avoid pitfalls and strife?  
Now who will teach her. Naught but life!

## Helpful Hints

To keep meringue from falling add one-fourth teaspoonful of baking powder to it.

If food becomes lodged in the throat, it can sometimes be worked out by pressing on the outside of the throat and working it upwards with the fingers.

If a wire egg whip is used for beating a cake, it will make the cake of a finer grain, as well as lighten the task.

It's the nap that keeps blankets warm to sleep under. They shouldn't be ironed because of this. The ribbons should be pressed with a warm iron.

### ANSWERS TO QUICK QUIZ

5. In 1859 when the "Galt Tariff" was introduced. 3. In 1920. 1. Less than 4 persons per square mile. 4. About \$12 million. 2. Manufacturing is now the leading industry in Newfoundland, New Brunswick, Nova Scotia, Quebec, Ontario, Manitoba and British Columbia.

(Material prepared by the editors of Quick Canadian Facts, the pocket annual of facts about Canada.) 3116

## OUR COMPLETE SHORT STORY—

## The chickens were laughing

—By BASCOM BIGGERS III

SUSAN waved a last goodbye, even when her sister and brother-in-law were out of sight and could not see it, and then went back into the empty house. They were gone and she had not gone with them. She clinched her little fists tightly, as though they could hold the tears in check, and sought quickly something to do. Her sister had insisted on helping with the dishes before they left. The kitchen floor. That hadn't been swept. She got the broom.

From out back, beyond the trees, came the cackle of the chickens. Before, the sound had kept her company, and she had imagined the chickens were laughing over some tremendous joke. Now the chickens only heightened the aloneness, laughing at her because she had stayed behind. Even the twitter and chirp of summer birds were hateful this morning as they emphasized the silence.

The plopping of the leaky faucet kept a steady beat to the swish of her broom. Last night she had laughed at the dripping faucet which none of them could stop. Now she hated it so much she could yank it from the wall.

## ARTHRITIS

Try Edoren, guaranteed herbal treatment for arthritic pains. Pleasant, safe, effective. Month's supply \$5. Money back guarantee. Write for particulars.

PICKWOOD PHARMACAL CO., LTD. Milton, Ontario.

60 Front Street W., Toronto.

Nothing was any fun alone.

The tears brimming her eyes broke loose, and she sat down on the kitchen stool and cried. They had begged her to go with them.

"It won't cost you anything but for your food," her sister had said, "and it'll be a wonderful month's vacation in Colorado, a place you've always wanted to see."

"Go on, honey. I'll manage here all right," George had said.

And she had wanted to go. Oh, she wanted to go! But she said, "No, I think I'd better not."

She said it at least once during every day of the week her sister was there. And she said it this morning with George gone to work and just her there to tell them goodbye. She said it choking back the tears, smiling until they were gone, and pretending she didn't really mind too much. But she did. And she resented George because she hadn't gone.

It was all right for him. He went to town to work every day where he met people and had company. But she was out here all alone every single day, with the nearest neighbor a mile away. The car didn't really span the difference, because when she visited a neighbor it always seemed more like a formal visit than a casual dropping in. And often there was never time. Oh, at times like these she hated this place and almost hated George too for putting her way out here.

Wiping her eyes she went down the hall to the bedrooms, half wondering if the beds would be made. Of course they weren't. The rumpled masses of white sheets and night clothes made the rooms seem an untidy mess.

She turned from them and hurried into the livingroom. This morning she would not make the beds. She didn't care if they never got made. "Today she was going to do only what she wanted to do. She was going to get away from this house and all its loneliness.

Grabbing the keys from the mantle, she pulled the door closed behind her and ran out to the car. She was a little frantic in her movements, as though she were trying to escape something. The car purred warmly. She slipped it into first and slid out of the driveway into the road.

Now that she was moving, she wondered where she would go. She didn't want to talk to anyone just now. For one crazy moment she thought of dashing after her sister and telling her to wait, she would go after all, that the house could run itself.

Again resentment against George burned her thoughts. He should be able to get along without her for a month. Why hadn't he insisted that she go? He should have known her sense of duty wouldn't let her do otherwise.

She passed a flaming brushpile

Fiery, Itching Skin  
Gets Quick Relief

Here is a clean stainless penetrating antiseptic that will bring you speedy relief from the itching and distress of Eczema, Itching Toes and Feet, Rashes and other itching skin troubles.

MOONE'S EMERALD OIL not only helps promote rapid and healthy healing in open sores and wounds, but boils and simple ulcers are also quickly relieved. In skin afflictions—the itching of Eczema is quickly eased. Pimples, skin eruptions dry up and scale off in a very few days.

MOONE'S EMERALD OIL can be obtained at any drug store satisfaction or money back.

FIRST PRIME MINISTER—Ahmadu, Sardana of Sokoto who has been elected the first Prime Minister of Northern Nigeria, a new constitution set up with the co-operation of the British Government. The rank of Sardana is a historical one, held only by a son of the Royal House of Sokoto.

and a thought prickled at her mind. Had she left the stove on? In the excitement of telling her sister goodbye, had she or hadn't she cut the eye off underneath the coffee? Of course the house was in no danger, but it would crack the new glass coffee pot if all the water had boiled out. And they were trying to save money. George had said he hoped they could have enough to take a vacation together toward the end of the summer. She had forgotten all about that.

At a fork in the road she turned the car around quickly and headed back home. She had to be certain that the stove was off.

She had forgotten all about that vacation she and George had planned. Or at least she thought she had forgotten. The idea of a vacation with her sister seemed completely unimportant in comparison. It wasn't the house or worrying about George not being able to get along without her that had made her refuse to go. It was this vacation with George. If she had gone now she couldn't have gone with him. And a vacation with him was what she wanted more than anything.

Pulling into the driveway she stopped the car, jumped out and hurried into the house. She had cut the stove off after all. She smiled and took the coffee pot from the stove, putting it on the window sill. Which reminded her, she had wanted to make some new curtains for the kitchen out of the flowered feed sacks. She had been planning that when her sister arrived and got everything out of order.

She would sew those curtains this morning, but first she would make the beds. As she headed for the bedroom she heard the chickens beyond the trees laughing at a very funny joke.

(Copyright Wheeler Newspaper Syndicate)

## Beauty base

The general contour of the face is influenced largely by the shape of the jaw which, in turn, is dependent to a great extent upon the teeth. Crooked, protruding or misshapen teeth cause the mouth and jaw to become distorted, a condition often due to neglect of dental care in childhood. Regular visits to the dentist should start when a youngster is three years of age. At that time dental cavities may be repaired and malformation of the mouth or jaw, caused by faulty tooth development, can be more easily treated.

The Parsnip river in the Cariboo district of British Columbia was discovered by Sir Alexander Mackenzie in 1793.

## Hardy Icelandic sheep said best for Canadian Arctic

OTTAWA.—Hardy Icelandic sheep are the most likely to survive in the Canadian Arctic, says Arni G. Eylands, assistant secretary of Iceland's agriculture ministry.

Mr. Eylands indicated in an interview Iceland might provide a number of sheep if Canada goes ahead with plans to start sheep breeding in the Far North to improve Eskimos' living standards.

He said Icelandic sheep were exported to Greenland 40 years ago for breeding purposes, and the animals have been thriving there ever since.

## Yields finer wool

Scottish black face sheep might also prove successful but not as much as the Icelandic type which, he said, provides a finer wool and more mutton. Some of the wool crop is exported to the United Kingdom.

Mr. Eylands is visiting here and among other things will discuss the problems of sheep breeding in colder climates with Canadian officials.

Agriculture experts last summer surveyed pasture possibilities on the southern shore of Ungava bay in far northern Quebec.

They reported the possibilities as reasonably bright.

Vegetation for summer pasture was found in small patches but field crops and soil experts said they believed a hardy type of grass for winter feeding might be raised.

## Discuss forestation

Mr. Eylands, who came from talks in Washington, said he also will approach Canadian officials at the forest experimentation station near Petawawa, Ont., to discuss forestation in the treeless little island country of the North Atlantic.

Other talks here will touch on the possibilities of a Canadian

eiderdown industry for the Arctic. Canada has a large duck population but no industry for eider-down, used mostly as stuffing for sleeping bags and heavy parkas. Iceland has a thriving industry.

Find supports  
North-South  
migration theory

A hilltop 20 miles from where the Firth river flows from the Yukon into the Arctic ocean may hold the answer to where the ancestors of Canada's Indians came from years ago.

Dr. Richard MacNeish, an archaeologist, is to investigate the hill next May to see if it contains evidence to support the theory that the natives of North America originally came from central Asia across a land bridge to Alaska.

While in the Yukon last summer, Dr. MacNeish accidentally discovered a few ancient flint and bone implements, apparently thousands of years old. Next summer, he hopes to uncover more.

If the tools are similar to relics found earlier in Alaska, the find will add important evidence to the theory that early peoples wandered down from the north into the continental plain.

## Flaky COFFEE CAKES

● These toothsome Flaky Coffee Cakes are a sample of the superb results you get with new Fleischmann's Active Dry Yeast! No more anxiety about yeast cakes that stale and weaken! Fleischmann's Active Dry Yeast keeps full-strength, fast-acting without refrigeration — get a month's supply!

## FLAKY COFFEE CAKES

● Scald ¾ c. cream, 2 lbs. granulated sugar, 1 tsp. salt and ¾ c. shortening; cool to lukewarm. Meanwhile, measure into a large bowl ½ c. lukewarm water, 1 tsp. granulated sugar; stir until sugar is dissolved. Sprinkle with 1 envelope Fleischmann's Active Dry Yeast. Let stand 10 minutes, THEN stir well.

Add cooled cream mixture and stir in 3 well-beaten eggs. Stir in 2 c. once-sifted bread flour; beat until smooth. Work in 2½ c. (about) once-sifted bread flour. Knead on lightly-floured board until smooth and elastic. Place in greased bowl and grease top of dough. Cover and set in a warm place, free from draught. Let rise until doubled in bulk. Mix ¾ c. granulated sugar and 2 tps. ground cinnamon; sprinkle half of this mixture on baking board. Divide dough into 2 equal portions and turn out one portion onto prepared board. Roll out into a 12" square; fold from back to front and from one side to the other. Repeat rolling and folding 3 more times, flouring board lightly if it becomes sticky. Seal edges of folded dough and place in a greased 8" square cake pan and pat out to fit the pan; butter top lightly and press walnut halves well into the dough. Sprinkle remaining sugar and cinnamon mixture on board and treat second portion of dough same as first portion. Cover and let rise until doubled in bulk. Bake in a moderate oven, 350°, 15 mins., while preparing the following syrup; simmer together for 5 mins., 1 c. granulated sugar, 1½ tps. grated orange rind, ¼ c. butter or margarine and ½ c. orange juice. Quickly pour hot syrup over the 2 partially-baked cakes and bake cakes about 15 mins. longer. Stand baked cakes on cake coolers for 20 minutes, then loosen edges and gently shake from pans.

## THE TILLERS

—By Les Carroll

### McKINNON—SPENCE

A quiet wedding was solemnized in Michichi United Church November 6th when Rita Mary Spence, younger daughter of J. W. Spence and the late Margaret Spence of Michichi, and Allan Leslie McKinnon of Calgary were united by Rev. F. G. Dunsmore.

The bride entered the church on the arm of her cousin, Jim Sharp. Her gown of white nylon was an original model of white nylon tulle poised over slipper satin. Lily-point sleeves were features of the lace bodice which was designed with scalloped collar daintily trimmed by meanderings with pearl centres. Her train lengthen ven of embroidered nylon tulle misted from a beaded cascade. She carried a white stole supported with trailing mauve ribbon.

Mrs. Jean Pearson of Carbon, sister of the bride, was dressed in a yellow tulle strapless tuck over a skirt of net topped with a bolero. She carried a nosegay of white carnations.

The groom was attended by his brother, Hugh McKinnon of Calgary. Jim Wannstrom, cousin of the bride, and Don McKinnon, brother of the groom, were ushers.

The Church was decorated with mums and house plants. Mrs. W. Dewsbury played the music. Ruth Dewsbury and Catherine Jamieson sang "God Gave Me You" during the signing of the register. The groom's mother wore navy

blue wool with red accessories.

An open house reception was held at the home of the bride. The table was centred with a four-tiered wedding cake. Mrs. Kate Foote of Calgary poured the tea, while Mrs. Mary Shapcott of Munson, aunt of the bride, poured the coffee. Hugh McKinnon proposed the toast to the bride and groom, which was replied to by the groom.

Pictures were taken by the groom's brother, Charles McKinnon of Edmonton, and brother-in-law, Philip Klem of Calgary.

The bride's going away costume was a dark grey flannel suit with brown and tan accessories. Her corsage was orchids.

Out-of-town guests were: Mr. and Mrs. P. Klem, Mrs. Kate Foote, Mr. and Mrs. A. McKinnon, Doris, Don and Hugh McKinnon, all of Calgary; Charlie McKinnon of Edmonton; Mr. and Mrs. Bruno Pedrini and family, Mr. and Mrs. R. Harrison and family of Drumheller; Mrs. Edwards, Craig and Jim; Mrs. Andrews with sons Ted and Jim of Pope Lease; Mr. and Mrs. Jim Sharp, Mrs. Mary Shapcott and Jimmy Wannstrom, Munson; Mr. and Mrs. D. G. Pearson of Carbon; Mr. and Mrs. E. Pearson of

Delia.

Mr. and Mrs. Allan McKinnon will reside in Carbon.

### A WORD OF WARNING

The Dairy Branch has been advised of a serious explosion that took place recently on a dairy farm a short distance out of Edmonton. It was due to the mixing of a chlorine disinfectant with a quaternary ammonium compound.

Both of these compounds are commonly used on farms, and both are used for the same purpose—namely disinfection of dairy utensils. Used singly they are both efficient bacteria killers.

Mixed together under the right conditions they can be extremely dangerous.

The Dairy Branch urges all farmers not to mix any chlorine compound with any quaternary ammonium compound under any circumstances. Follow the directions for use given by the manufacturer.

### HEALTH EDUCATION

Today's children are taller, sturdier and healthier than those of a generation ago. Much of this improvement is due to the increase in health education among

## Opportunity FOR A CAREER IN "FREEDOM" INSURANCE

In the trained skill and courage of Canada's soldiers lies a wealth of insurance... "Freedom" insurance... for peace... against aggression.

The opportunities for young men with the right temperament and intelligence to make a career in the Army are excellent. As a modern, progressive organization, the Army is equipped to offer top rate schooling and training to career soldiers. There is a place in the Canadian Army for young men who can meet the challenge.

The Army has a continuing need for good men... men like you, who want to make a career of protecting Canada's freedom, and your own, in the Army.

Serve Canada and Yourself in the Army

To be eligible you must be 17 to 40 years of age, skilled tradesmen to 45. When applying bring birth certificate or other proof of age. Apply right away—For full information write or visit the Army Recruiting Centre nearest your home.
